The Autism Teaching Company was established to meet the needs of individuals with autism and those who teach and care for them. We recognised a growing need to provide a more responsive and cohesive service. Our teaching team are all experienced professionals who have a wealth of knowledge in the field of Autistic Spectrum Conditions.

CALLING ALL PARENTS & CARERS

# AUTISM

we get it...

# SUPPORT FOR PARENTS & CARERS OF CHILDREN WITH AUTISM

## THE EFFECT OF AUTISM

We can help your child understand their diagnosis and support the family to understand what it means for you within the home and school environments.

The **Autism Teaching Company** can also work sensitively with you to help you to explain how autism affects your family to others.

## BEHAVIOUR

The ability to accept and respond to change can impact on an autistic young person and on family life.

We can support you to identify the triggers which result in inappropriate behaviours and teach all the family strategies to promote a more positive outcome.

We will increase your child's ability to respond more flexibly and so feel more comfortable with daily routines and family life.

## EMOTIONS

Children with autism spectrum disorders may have difficulty regulating their emotions or expressing themselves appropriately. They can also have difficulties understanding the feelings of others. Teachers from the **AuTC** can promote an increased awareness, resulting in more positive interactions with others.

## FRIENDSHIPS

Making and maintaining friendships can be an area of challenge. The **Autism Teaching Company** can help young people make sense of the complex social arena by providing structure to social interactions leading to enhanced social skills.

## SENSORY DIFFERENCES

Many young people on the autistic spectrum have sensory differences which have a big impact on their daily life. We can evaluate the environment and recommend actions to reduce and alleviate sensory issues.

## HOME AND SCHOOL

Direct teaching support from an **AuTC** Specialist Teacher at home and in the school environment can equip your child with appropriate skills to enable them to achieve their full potential.

We encourage home and school to work together with us and other agencies, such as Speech and Language Therapists and Occupational Therapists, in order to develop positive relationships with all, and offer joined-up support for your child throughout the whole day.

Our support includes teaching and advice on routines, structure, organisation, homework and exam preparation.

## TRANSITION

We will help develop bespoke strategies that can help your child cope with new environments and our Specialist Teachers can support liaison visits to highlight focus areas.

## CONFIDENTIALITY

At all times the highest levels of confidentiality are maintained by the **Autism Teaching Company**.
